INTRO

With the world-famous terra-cotta museum besides it, **YINGLONG SUPERHARD MATERIALS MANUFACTORY** is a professional corporation with over 30 years of experience in manufacturing, sales and the R&D of new technologies. Our main products include two series of CBN & Diamond grinding-wheels with dozens of types and more than two thousand patterns, and every kind of blades and cutters.

We have built a world class reputation with our clients as we have the most modern and sophisticated machinery and state-of-the-art technology. In addition, our top level professional engineers control every phase of the process of manufacturing and quality control. Yinglong has successfully developed abrasives which are competitive with high quality imported products, resulting in considerable foreign exchange savings for our customers. Our products are exported to Mid-Asia, Southeast-Asia etc. We hold as our motto "High standards, Excellent Customer Service" and work to achieve a mutually beneficial relationship with new & old clients around the world.

YINGLONG SUPERHARD
MATERIALS MANUFACTORY

PRODUCTS

In recent years, under the basis of absorbed International advanced technology, we successfully developed the Grinding-wheels and the Thin-Cutter Blades and Knives for the Corrugated Slitter and Scorer machine. It is an advanced technology achievement mainly serve for the Corrugated field.

Since the products were used, hundreds of clients proved that every point of our Grinding wheels and blades had achieved the International advanced level. We possess the merit of reasonable price as well as excellent quality. Our products had won the toppest list of this field in recent years, and we developed into the major manufacturer of Diamond/CBN Grinding wheel and the Cutters in the P.R.C.

NETWORK

Now we cooperated with dozens of domestic and foreign corporations. Hubei Jinshan totally devoted with our Grinding-wheels and Blades. Our products also export to Mid-Asia, Korea, Japan, Egypt, Vietnam, Taiwan, HongKong, Southeast-Asia, Mid-East, Africa, America and Europe etc. around the whole world.

YINGLONG SUPERHARD MATERIALS MANUFACTORY

MAIN

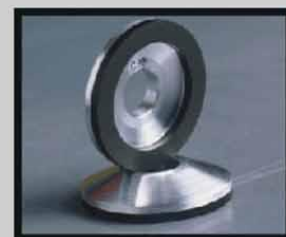

PRODUCTS

SPECIALTY

YINGLONG Grinding stones pocessed the following characteristics:

- 1, Adopt of Superhard Abrasive-materials of Synthetic Diamond and CBN(Cubic Boron Nitride), which can satisfy all the thin-cutter blades in the materials of High-speed steel and Hard-Alloy (YG8).
- 2, Resinoid bond which is the most suitable binder to the working of thin-cutters, it will keep the excellent grinding-capability of the Grinding-wheel at any time.
- 3, Different kinds of granularities suit to the different grindings under certain materials and situations: Coarse-grinding in 80#-120#, Half-coarse in 120#-180#, Fine-grinding in 180#-W40, Polishing in W40-W0.5. The high glabrous-degree of the hard-alloy with high requirements to the grinding of blades, which is suit to choose between 180#-240#, while the cutter in the materials of high-speed steel is in 100#-150#.
- 4, Reasonable collaborations of Grinding-wheels in different densities will bring lots of merits for instance finer grinding and suit to the different cutters.

ADVANTAGES

>>> Special-used Grinding wheels for thin-cutter slit-scoring machine in corrugated carton production line include special wheels for hard-alloy blade, high-speed steel blade and Grinding wheels for blades in miscellaneous materials.

>>> Import of excellent materials, unique formula and advanced technologies have been adopted in “**YINGLONG**” Grinding wheels. Senior engineers strictly control the overall production process and ensure the qualities of products.

>>> Featuring with sharp blade and excellent weariness, our products have been proved to reach the international advanced level. We have experienced and skillful technicians who ensure that both size and specification of every **YINGLONG** wheel can meet the international standard.

YINGLONG SUPERHARD MATERIALS MANUFACTORY

MAIN

PRODUCTS

Blades & Knives "YINGLONG" specially manufacture Blades and Knives:

1. Thin Cutter Blades and Knives in High Speed Steel (HSS) Materials.
2. Thin Cutter Blades and Knives in Tungsten Carbide (YG8) Materials.
3. Thin Cutter Blades and Knives in Chrome Steel and Alloy Steel etc.

The Thin Cutter Blades and Knives esp. used in the field of Corrugated. Adopted in the Corrugator line, used for the machine of Slitter Scorer, either on the Rotary Round Knives, or the High Speed Cutting Blades. "YINGLONG" process the unique skills and technologies, as well as more than 30 years experiences on manufacturing Blades and Knives. We are capable to provide the best qualities with most competitive prices to our customers.

Around these years, "YINGLONG" successfully developed and prompted our Thin Cutter Blades and Knives in various materials to the whole world. We had won great reputations around our customers by our advantages. Our products exported to Europe, Asia, America and Australia etc. with satisfiable replacing products to the original products.

MERITS

Our Advantages:

1. Totally control and familiar to the process of grinding. "YINGLONG" is a manufacturer of Grinding wheels itself, so our blades and knives totally under strict and perfect grinding process. Which make our products more balance and brightful, it can improve the performances much in nature of cutting efficiency and usage life-time.
2. Historical experiences on manufacturing and technologies. We have more than 30 years on manufacture Blades, Knives and Grinding wheels. So we totally control the phase for manufacture, and capable to solve all the technical problems for our customers.
3. Costs saving to favorite prices. We have our unique formula and experiences to save much cost. So our prices are very competitive on International market. It can compete with big suppliers of blades while the quotations are much more favorite.

硬 质 合 金 薄 刀

安全-高效-价廉的各类刀片

- ★ 广泛应用于各类切割用途.
- ★ 高效, 易用, 安全, 价廉.
- ★ 供货时间灵活, 规格繁多.
- ★ 切割精度高, 耐磨性良好.
- ★ 产品出口至世界各国, 广受好评.
- ★ 从用户角度出发研制产品.
- ★ 优良快捷的客户服务.
- ★ 可根据不同需求订制产品.
